

## Stainless Matt Glass

For the frosted (sandblasting) glass of early days, the main problem is the surface easy to dirty by oil sludge, hand print, and dirt. It makes people to have feeling of the dirty is caused by long period of use. So STANLEY GLASS researches and develops new manufacture process of Stainless Poly Matt Glass and Stainless Poly Clear Glass.

The surface of the products of Stainless series is smooth and exquisite. It has the features of no hand sweat spot, not easy to damage by scratch, easy to clean, the characteristic of hand dirty-free, no deterioration forever, and the soft misty visual effect. It is an incomparable and innovative product with the general sandblasting glass.

## Characteristics

1. Smooth and exquisite surface.
